HOW IT WORKS:

Each pool has 2 levels:
L1 (2 slots) and **L2** (4 slots)

Fill **L1** (2 slots) →
receive **L1** income

Fill **L2** (4 more slots) →
receive **L2** income →

SPILOVER POWER

YOU DON'T HAVE TO DO IT ALONE

THE POWER OF SPILOVER

In the Auto Pool binary system, your upline — the people above you — are also filling slots in the same pool queues. When they refer new members, those members get placed into the next available slot in the binary tree. That slot could be **YOURS**.

WHAT THIS MEANS

Even if you refer zero people, your upline's activity can fill your L1 and L2 slots

The more active your upline and network, the faster your slots fill

You benefit from the entire network's growth — not just your own effort

This is true passive spillover — built into the smart contract

EXAMPLE

Your sponsor refers 10 people this week. The binary system places them sequentially. Some land under you.

YOUR SLOTS FILL. YOU EARN.

You didn't refer anyone this week — but you still earned.

SPILOVER IS NOT A PROMISE.
IT IS A SMART CONTRACT MECHANIC.

The queue is **FIFO** — **First In, First Out**. Earlier you join, deeper you sit in the tree, more spillover reaches you.

JOIN EARLY. SIT DEEP.
Let the orbit work for you.

HOW SPILOVER WORKS (BEHIND THE SCENES)

1

UPLINE REFERS A NEW MEMBER

New member joins through anyone in your upline.

2

SYSTEM PLACES IN NEXT SLOT

Smart contract places member in the next available slot in the binary tree (FIFO).

3

YOUR SLOT GETS FILLED

If the slot is under you, your L1 or L2 is filled automatically.

4

POOL CYCLE COMPLETES

When L1 (2) and L2 (4) are filled, pool cycle completes.

5

PAYMENT IS MADE

Income is sent to eligible members automatically from the contract.
